Hawaii Allstar Emergency Communications Net Control Script

This is_____, net control this evening for the Hawaii Allstar Emergency Communications net. This net is being coordinated to test equipment, find out which repeater you are using, and determine emergency backup power. This is a directed net. Stations should not transmit unless invited to do so by Net Control.

This net yields to emergency and priority traffic. Is there is any emergency or priority traffic at this time, come now with your call sign. (If there is, deal with it.)

No Emergency traffic heard.

Good Evening! Welcome to the Hawaii Allstar Emergency Communications Net. Because we will be using several different networks on the system tonight, we ask you to please hold your mic button down for two seconds before speaking to allow your message to propagate through the various systems without anyone missing out on parts of your message.

The order of operation tonight will be for those checking in is to advise the following:

Callsign and Name – Using ITU Phonetics
What repeater are coming through the system?
What type of battery backup power

Take down the call signs…

Proceed through the check-ins. At the end, ask for any additional checks in's.

We have reached the end of our Hawaii Allstar Emergency CommunicationsNet check ins.

Wrap Up: "Thank you for all of your check ins and comments…   We had _____ check-ins this evening. The Hawaii Allstar Communications net is now closed at (time _____). 73 and aloha, this is _____ turning system back to normal amateur radio use."
